

Task Card

Guide to clean stainless steel surfaces to leave them shiny and streak free.

Equipment Required

- 1 Safety Signs.
PPE - Gloves.
Plus any additional PPE specific to the Cleaning Solution.

- 2 Bucket (Colour coded).
Cleaning cloths.

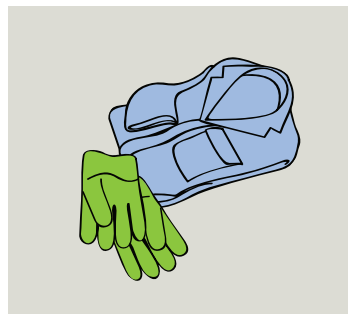

- 3 Cleaning solution (Stainless steel safe).
Stainless Steel Cleaner.

Preparation

- 1 Place safety signs.

- 2 Wear appropriate PPE.

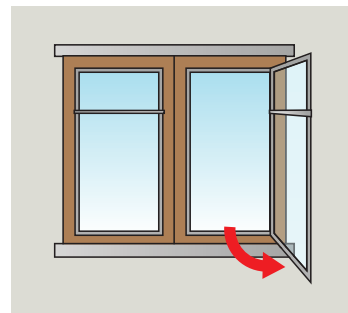

- 3 Check bucket is clean and ready to use. If dirty, rinse out with clean water.

- 4 Fill bucket half way with water.

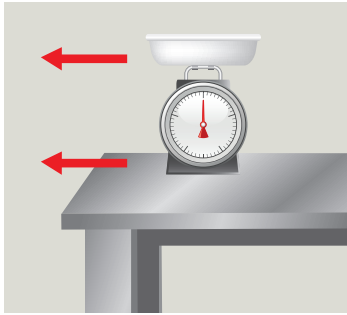

- 5 Add cleaning solution to the water according to directions on the label.
(Note: Always add chemical to water, not the other way round as to avoid chemical splashing).

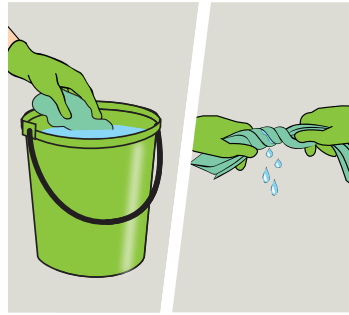

- 6 If possible, ventilate the room. i.e. open windows.

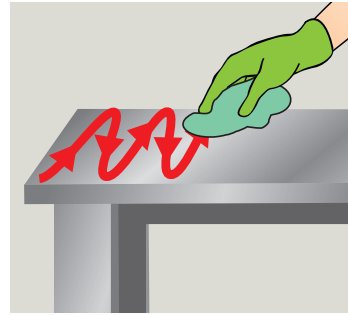

Cleaning the Stainless Steel

- 1** Remove any items from the area.

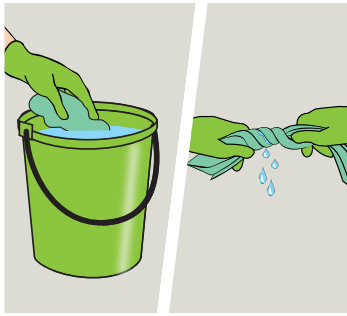

- 2** Use a colour coded cloth wrung out in stainless steel safe cleaning solution.

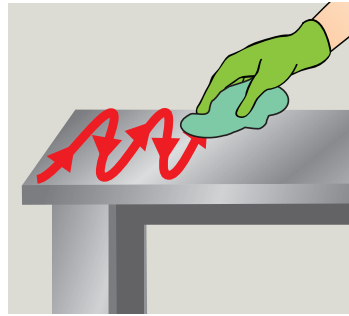

- 3** Wipe clean the stainless steel surface in the direction of the grain.

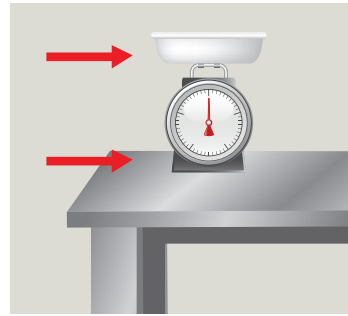

- 4** Refill the bucket with water.

- 5** Wring out the cloth.

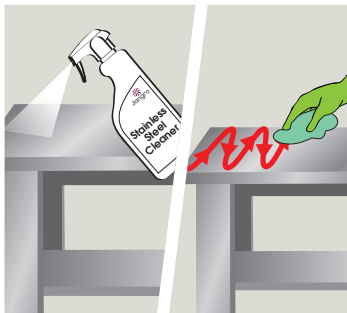

- 6** Rinse the stainless steel surface well.

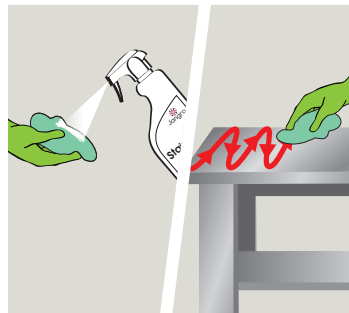

- 7** Replace all items.

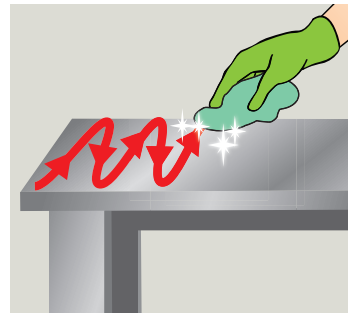

Applying Stainless Steel Cleaner

- 1** On a clean surface spray stainless steel cleaner directly onto surface. Wipe immediately with a clean dry cloth.

- 2** For smaller areas, spray onto a cloth then wipe surface.

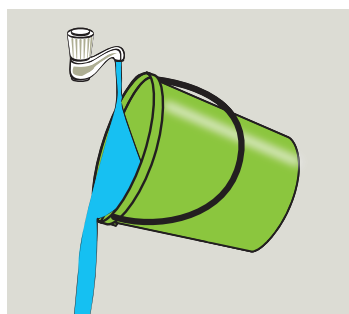

- 3** Polish dry with a soft clean microfibre cloth.

Final Stages

- 1** Discard dirty water from the bucket.

- 2** Clean and dry the bucket.

- 3** Dispose/Laundry the cloth.

- 4** Remove safety signs when area is dry and clear of trip hazards.
