

# Grease Trap Maintainer

Jangro

PREMIUM

## BC280-5

### Features and Benefits

- Degrades grease and solid waste
- Effective on all types of drains and small-bore pipes
- Reduces odours
- No harmful properties
- Maintains septic tanks, grease traps and complete sewerage systems
- Improves drain flow-rates

### Description

Grease Trap Maintainer is a stable liquid containing micro-organisms and enzymes, that efficiently reduce the wastes typically evacuated into the drainage systems of kitchens and other catering and food processing units.

Grease Trap Maintainer is suitable for use in all types of drains, sinks and small-bore pipes, as well as for maintaining septic tanks, grease traps and complete sewerage systems.

Grease Trap Maintainer has a two stage operation. When activated with water the "free" enzymes quickly break down the waste into smaller pieces, which are more accessible to the micro-organisms. This initial degradation immediately improves drain flow rates and reduces odours. It also enables the various strains of micro organisms in Grease

Trap Maintainer to quickly continue the degrading process, further reducing the smaller particles of solid waste (such as fat, paper and vegetable trimmings) into liquids and gasses.

### Technical Information

Grease Trap Maintainer contains many strains of non-harmful micro-organisms.

Grease Trap Maintainer is a tan liquid with a very slight yeast fragrance.

### Packaging

**Code**  
BC280-5 5 litre  
(Order 2 for a full case)

### Storage

Grease Trap Maintainer is stable for a minimum of 12 months if stored in its original, sealed container, in cool dry conditions, away from direct sunlight.
