

Entra-Clean HygienePlus

NEW

Prevent the spread of walked in bacteria, viruses and infectious microorganisms.

COVID-19 Response Range

Products and guidance on managing facilities during the Coronavirus pandemic in 2020.

Introduction

COVID-19 (Coronavirus) has become a global pandemic in 2020 and governments, businesses and members of the public are having to take unprecedented steps to protect themselves and others. Whilst many countries are easing their lockdowns, normal socialising is strictly prohibited. Social distancing and contamination control are effective ways to reduce the risk of the virus spreading. This range of social distancing and hygiene products from Jangro are designed to help businesses operate efficiently and safely.

Our Passion

Floor mats are an often-overlooked item, but if the right product is applied first time, the benefits can be felt further down the line – from initial cost savings through to reduced cleaning and replacement expense. We have expanded and refined a range of dependable products, ideal for facilities management.

Our Service

Our experienced team of matting experts are free and available for site survey visits around the UK and Ireland. We will work with you to determine the best product solution for your environment, so that your investment is rewarded.

Solutions

Our product range offers an option for every budget and situation. It broadly spans loose lay entrance mats and fitted entrance systems, non-slip mats for bar and kitchen areas, to comfort mats for Reception staff and other personnel.

Next Day Delivery

We are able to offer next day delivery on stock items – please request when placing your order. Standard delivery is 2-3 working days.

- Orthomat® Social Distancing
- Hygimat – Fatigue relief for health

The Issues

Social distancing

Visual aids are key to communicate to visitors and employees your specific guidance around social distancing. The UK government's guidance on social distancing remains 2 metres wherever possible. For businesses that can't operate with 2m such as pubs and hairdressers, we have a range of smaller mats, including directional signs and other instructions around enhanced hygiene such as hand sanitisation.

Fatigue

One thing that hasn't changed since the COVID-19 pandemic reached the UK, is that key workers across the country in supermarkets, warehouses, and manufacturing locations have stoically been attending work. Issues from standing fatigue and health ailments caused by prolonged standing haven't gone away. We've updated two of our key Orthomat® products with social distancing messaging. And our newer Hygimat product is an ideal way to bring fatigue relief into hygienic sensitive locations.

Cross-contamination

There has been a huge campaign of public awareness since the pandemic began and so everyone is aware the risks posed by physical contact with items that may be carrying viruses.

There is perhaps less awareness around viruses and other germs being transported on people's footwear between different buildings and departments.

Due to the COVID-19 pandemic, contamination control is more important now than ever before. Contamination between buildings and rooms occurs at the threshold, and all doorways have one thing in common, a doormat. Our range of tack mats and entrance mats are designed to improve hygiene and reduce walked in bacteria and other particles.

NEW

Elimination of bacteria

Cleanliness on a microbial level

Prevent the spread of walked in bacteria, viruses and infectious microorganisms.

Entra-Clean HygienePlus

The washable doormat that actively kills germs

- Removes visible dirt and kills invisible microbes.
- HygienePlus means the mat is treated with the EU-registered biocide, BI-OME registered with OEKO-TEX® an antimicrobial and virus reducing technology. BI-OME works by effectively killing bacteria when contact is made with the mat.
- Although the treatment is a highly effective antimicrobial agent, it does not cause any skin irritations.
- A new concept in entrance matting.
- Improve floor level hygiene around your business – important whilst fighting Covid-19 and beyond.
- More sustainable – less frequent washing required, and on lower temperatures.
- Free of metals.
- Fully machine washable – with no reduction in active cleaning power for the life of the mat.
- Suitable for all facilities, in particular offices, hotels and leisure, retirement homes and healthcare settings.
- Reduces annoying odours caused by bacteria and fungi.

Colour	Mat Size	Part Code

	1.2m x 1.8m	HK783-BR
	1.2m x 2.4m	HK784-BR

Entra-Clean HygienePlus

A Revolution in Floor-Level Cleanliness

first doormat with active germ-killing technology built-in. A ground-breaking new antimicrobial treatment makes this product much more than simply another entrance mat.

How does the new Entra-Clean Hygiene+ work?

Hygiene+ is a game changer. In addition to the high quality materials and construction, Entra-Clean Hygiene+ is treated with BI-OME, an antimicrobial and virus reducing technology. Even if you are not actively cleaning, the doormat remains clean on microbial level and the technology remains active throughout the lifespan of the mat.

What is BI-OME treatment?

BI-OME is a biocide agent that has a durable viral reducing effect on surfaces such as entrance mats. The treatment with BI-OME can reduce the viral activity of enveloped viruses in a time span of 2 hours, while the half life (time it takes for 50% of the viruses not to become infectious) is about 4 hours for untreated surfaces.

What happens if the doormat is cleaned or machine washed?

You can clean Entra-Clean Hygiene+ like any other doormat, you can even machine wash it. The treatment with BI-OME stays on the fibres and remains active, this means you can wash it on lower temperatures to save energy and still have a doormat that is clean on microbial levels.

BI-OME is a registered and tested treatment

The **BI-OME** treatment is registered with **OEKO-TEX®** to guarantee maximum consumer safety and BPR (PT2, PT7, PT9) registered with ECHA (European Chemicals Agency).

Benefits of a Hygiene+ treated doormat:

- Elimination of bacteria
- Cleanliness on a microbial level
- Reduced odour
- Possible reduction of viral activity of enveloped viruses
- Less water consumption, less frequent washing required
- Energy saving by washing on low temperatures
- Does not cause skin irritation
- Free of metals
- Permanent technology

Other products available with HygienePlus treatment

The new BI-OME treatment technology is also available on our **Promomat** and **Cosmo** doormats. Minimum order quantities apply – please ask for details.

Use in conjunction with a Microfibre mat

HygiWell Disinfectant Foot Bath

**Loose lay disinfectant floor mat,
ideal to support COVID-19 protection**

- Deep 'well' holds liquid disinfectant for effective cleaning of footwear at entrances.
- Made from 100% recycled REACH-compliant PVC material.
- Specially designed flexible scrapers remove dirt and allow footwear to immerse in disinfectant.
- Suitable for any location where hygiene is important such as farm buildings, abattoirs, and food processing factories.
- 1.75 ltr recommended disinfectant volume.
- 100% recyclable.
- A+ BREEAM rating.
- Ramped edges reduce the risk of tripping.

Mat Size	Part Code	Weight	Disinfectant
550 mm x 800 mm	HK750	3.5 kg	up to 1.75 litres

Place on level surface • Fill base with liquid disinfectant • Step in to scrape and sanitise • Combine with an absorbent mat to dry footwear. • Use multiple mats to create a larger disinfectant area.

Moisture Control Mat
The perfect walk-off
for Disinfectant Mats

Microfibre Doormat

Washable doormat with super absorbency and microfibre technology

- Hygienic microfibre technology with flexible, ultra-fine fibres provide deep-cleaning action.
- Effectively penetrates those hard to reach treads on footwear. Friction from the fibres generates a static charge that attracts and traps dust/debris.
- Effectively penetrates those hard to reach treads on footwear and wheeled trolleys.
- Superior 'brushing and wiping' with 'rapid dry' properties that outperform cotton.
- Luxuriously soft pile that keeps entrances looking smart, stylish and free from lint.
- Environmentally-friendly – does not require chemical pre-treatment or washing detergents.
- Material: Microfibre
- Product Height: 8 mm

First-Step

The first step to contamination control

- A hygienic pad of peel-off, disposable sheets, to protect against bacteria, mould and mildew.
- The 'tacky' sheets capture dirt and dust from footwear and wheeled equipment for contamination control.
- When the top sheet becomes soiled, simply peel off to reveal a clean layer.
- Comes with self-adhesive backing to keep the mat in place.
- Ideal for hospitals, clean rooms, general industrial environments, and any other area where hygiene is an important factor.
- Product Height: 1.5 mm

Size

0.45 m x 1.17 m (Pack of 4)

Business Being COVID-19 Secure

Many businesses, such as supermarkets, manufacturers and logistics providers have remained open throughout the pandemic to serve key workers and key industries, and therefore have had to learn how to mitigate risk and meet government recommendations around health and safety as they go. Other industries such as hospitality and retail, having been closed for several months, are also now determining what their 'new normal' will look like. In either case we are in uncharted territory for most people, and are learning as we go.

Enforcing Social Distancing

Whether it's general messaging at the door, one way systems, or reminders to stay hygienic, businesses are thinking about how people move around their workplaces in more detail than ever before. Every business and every building will have its own specific needs, but using frequent visual reminders such as

floor tape, floor mats, and signage, is the most effective way to communicate your rules when there may not be a member of staff available. Mats are great because they can be picked up and moved around.

Reducing cross-contamination

Most responsible people now know to wash or sanitise their hands, not touch their face, and not touch things they don't need to. However, in nearly all businesses there is a level of human interaction required to communicate. SafeScreen Pro offers a clear barrier that can protect people at their desk or reception. Also, simply moving around a building or site also presents the hidden danger of contamination from footwear. Viruses fall to the floor and can be tracked around by people walking. With a disinfectant mat at key thresholds this form of contamination can be stopped dead.

SitePath Branded

Create high visibility walkways with your own messaging

- A lightweight matting for easy deployment on construction or factory sites. with printed branding or signage graphics.
- Flexible material can be laid onto uneven surfaces.
- Diamond pattern top surface.
- Yellow colour ensures walkways are easily visible.

Education

Being COVID-19 Secure

With schools already reopen for some pupils and more due to return soon, social distancing rules will need to be followed for the safety of the children, their teachers, and the community. This is a big challenge for school staff, especially those in early years education.

The unprecedented circumstances we find ourselves in are a challenge for everyone. Even more for all those in schools and nurseries, as it is vital to communicate the importance of staying apart to children in addition to the pressures of the regular curriculum.

A lot of adults struggle with the advice given by scientists and the government and are not always sure what is the best way to deal with a situation. So how can young people be expected to understand and cope with this in order to be kept as safe as possible?

It is not only the classroom and the playground but also drop off and pick up times, lunch, and the handling of equipment has to be taken into consideration.

Hygiene and distancing

New routines have to be established, washing hands more often, disinfecting surfaces and children not sitting or standing as close to their friends as they might like. This is a very big ask for all young people. Smaller children may struggle to understand the seriousness of the situation, and teenagers, who by nature are more likely to test rules and boundaries.

Visuals help understanding and retention

We all know the saying – a picture paints a thousand words. And it is true, particularly when it comes to remembering advice when surrounded by distractions.

This starts with easy to apply and highly visible segmentation in drop off zones and in the playground, which can be achieved by using self-adhesive tapes or line making paint to highlight spaces for different groups and distances that should be kept in different colours.

Social distancing help for little people

Clear and easy to understand messaging is provided with our social distancing mats especially designed for schools, colleges and universities. They are easy to lay out, stay in place but can be relocated with ease. The social distancing floor mats can be machine washed to keep their appealing look and their important message visible over time, unlike than floor stickers that may deteriorate and need to be replaced after time. For small children we have smaller mats with cute animal motives to mark areas of personal play space in nursery or classrooms.

Social Distancing Floor Mats for Schools

Loose lay floor mats to promote social distancing in education

- Communicate social distancing rules to your pupils to reduce risk of coronavirus spread.
- Ideal for schools, colleges, and universities.
