

Remove food waste and other rubbish as quickly as possible.

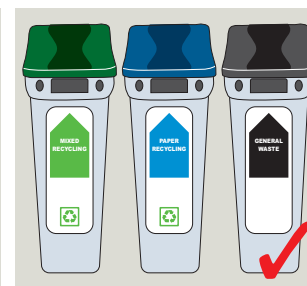

Put food waste and other rubbish in containers that can be closed.

Containers or systems of disposing of waste must be kept in sound condition, be easy to clean and disinfect.

Stores for waste must be kept clean and, where necessary, free of animals and pests.

Get rid of all waste in a hygienic and environmentally friendly way.

The waste must not be a direct or indirect source of contamination.

Disposal of cooking oil

You must ensure that waste cooking oil is stored properly, not allowed to spill and that it is collected by an authorised collector.

Waste cooking oil must not be poured down drains.

Waste cooking oil should not be disposed of with the rest of the catering or kitchen waste.

Waste cooking oil should not be taken to household recycling centres.
